

Designing Working Sessions That Drive Outcomes

Jeff Escott

Nisha Dekhtawala

It is Thursday at 2pm.

**Your customer asked you to present on
migration strategies.**

You open PowerPoint.

Stop.

The Decision-First Framework

Before you build a single slide, answer four questions

- 1** What decision needs to be made?
- 2** Who needs to be in the room to make it?
- 3** What information do they need to commit?
- 4** What is blocking them from deciding today?

Topics lead to slide decks. Decisions lead to outcomes.

The Working Session Canvas

One-page blueprint for decision-driving sessions

Section

Decision Statement

What Goes Here

One sentence. If you cannot state it in one sentence, you do not understand it yet.

Stakeholder Map

Who is in the room, what each person cares about, where they disagree.

Activities (3-4)

Exercises that produce customer-owned artifacts. Not content you deliver.

BeSA Become a Solutions Architect

Your Facilitation Toolkit

Three portable exercises for any working session

1

The Criteria Exercise: "What matters most?"
Forces the room to define their evaluation framework.

2

The Options Matrix: Customer fills in the grid.
Gaps become owned action items.

3

The Consequences Conversation: "If we choose X, what happens to Y?"
Makes trade-offs concrete.

BeSA Become a Solutions Architect

The 60-Minute Shape

The agenda. Your toolkit exercises slot into specific phases.

Context Setting (5 min)

Diverge (10 min)
Criteria Exercise

Converge (10 min)
Consequences Conversation

Decide (15 min)
Options Matrix

Commit (5 min)

Result:

Names. Actions. Deadlines.

Written in front of everyone.
